

Ken Chio

邱開昀

iGaming product leader with 8+ years across B2B2C platforms in Southeast Asia. Owns player-facing conversion, deposits, games, and wallet journeys from strategy through launch.

Works daily in English with providers and cross-functional teams across Malaysia, Thailand, and Vietnam.

DIRECT B2C LAUNCH

\$wish

Live on the App Store

Owned the value proposition, business model, and specifications for 20+ screens through release.

PLAYER CONVERSION

-25%

Client-reported FTD CPA

Reduced from \$12 to \$9 after a deposit bonus-preview redesign.

LIVE GAME JOURNEYS

3 providers

Free-spin journeys launched

From player award and game entry through results and bonus-wallet settlement.

WORK EXPERIENCE

2025.09 - Present	Senior Product Manager Success Integration Technology
iGaming platform	- Led the end-to-end product design and launch of provider-specific free-spin journeys across three live game providers, covering player awards, notifications, game entry, result display, and bonus-wallet settlement. Additional integrations are underway. - Translated distinct provider mechanics into production player flows. Defined operator-configured and platform-derived rules, provider callbacks, non-withdrawable bonus treatment, in-game win display, and back-office issuance records. - Launched an automated offline-deposit flow based on bank notification parsing. Replaced most manual verification and partnered with Operations to position the mechanism within the existing deposit architecture. - Collaborates daily in English with providers, overseas clients, and cross-functional teams across Malaysia, Thailand, and Vietnam.
2023.09 - 2025.06	Product Team Leader K36
Southeast Asia	- Responded to a \$12 FTD CPA against an \$8 benchmark in Vietnam and Thailand. Found the deposit page lacked an expected-bonus preview, then led delivery with Marketing, client, design, and engineering teams. Client-reported CPA fell to \$9 after launch. - Owned product strategy for a multi-market iGaming platform used by operators to serve players across Asia. Managed promotions, bonus wallet, ad tracking, and USDT payment integrations. - Built a 600+ item opportunity pool into a three-tier product, module, and feature roadmap. Owned prioritization at the product-strategy level. - Developed four junior PMs within a 40+ person full-stack organization through guided autonomy, transparent roadmaps, and value-based review.
