

Ken Chio

邱開昀

Product Team Lead with 8+ years delivering platform products across iGaming and B2B SaaS industries in Asia — having led a PM team of 4 within a 40+ person full-stack organization, with outcomes including a 33% CPA reduction and NT\$40M project portfolio. Focused on building scalable product processes and developing product talent through structured autonomy and clear value prioritization.

WORK EXPERIENCE

2025.09 - Present

Senior Product Manager - Success Integration Technology

- ▶ Leading the integration design that brings multiple game providers' free-spin (free game) mechanics into the platform — researching each provider's award and result-callback APIs, defining which fields are operator-configured versus platform-derived, and positioning free-spin winnings correctly as non-withdrawable bonus rather than cash within the existing wallet architecture.
- ▶ Designing the win-result callback flow across internal services — defining which service ingests provider win data and how it propagates to player-facing notifications, in-game win display, and operator back-office issuance records — and driving finance alignment on whether free-spin payouts are billed in the monthly provider settlement.
- ▶ Designed and delivered the integration spec for a non-standard automated offline deposit mechanism — a third-party flow that verifies player transfers via bank notification parsing — including defining the classification framework to correctly position the new mechanism within the platform's existing deposit architecture.

2023.09 - 2025.06

Product Team Leader - K36

- ▶ Owned product strategy for a high-competition B2B SaaS platform serving multi-market gaming operators across Asia.
- ▶ Built a 600+ item wish pool system feeding into a 3-tier roadmap (product → module → feature), owning the top-level product strategy layer.
- ▶ Developed 4 Jr PMs through guided autonomy — provided full product roadmap visibility, had each propose their own focus areas, then reviewed all proposals against a highest-business-value principle before granting end-to-end ownership from feature roadmap to spec documentation.
- ▶ Managed core modules: Promotions, bonus wallet, ad tracking, USDT payment integration.
- ▶ Cut CPA from \$12 to \$8 (-33%) through deposit UX optimization.

2021.10 - 2023.09

Product/Project Manager - Funpodium

- ▶ Managed SaaS Backend Service product across China, Thailand, and Vietnam, coordinating a 15-person cross-functional project team (frontend, backend, QA, DevOps, UI/UX).
- ▶ Drove two process improvements: (1) replaced an unstructured Jira backlog with a priority-managed delivery tracker, adding spec documentation per ticket and running weekly priority reviews with the team; (2) implemented story-point estimation during a company-wide Waterfall-to-Scrum transition, applied first on a major platform refactoring project.
- ▶ Maintained 10+ CMS backend services across 3 markets.

2020.04 - 2021.09

Product/Project Manager - Cloudware.co

- Managed product delivery for a B2B white-label platform serving operators across India, Korea, and China.
- Introduced consultative B2B client communication across 20+ white-label platforms — analyzing the intent behind each client request, proposing solution options with explicit pros, cons, and trade-offs, and proactively surfacing implementation considerations before execution.

2017.07 - 2019.08

Product/Project Manager - Beseye

- Led end-to-end development of an AI-powered retail surveillance turnkey solution — coordinating training data collection, internal and external labeling pipelines, and accuracy definition with RD, through to feature design for intruder detection and people-counting across small and chain retail stores.
- Built the field deployment SOP from scratch through direct on-site involvement, then transitioned execution to a hardware PM while maintaining remote acceptance oversight — delivering NT\$40M in projects across 100+ stores, including Far Eastern A13 and Huawei smart store implementations.
- Contributed to the company's Computex 2019 Best Choice Award through product presentation and award documentation.
